Follow these steps to find the MAC (Media Access Control) address, also known as the physical address or hardware address, on a Windows 7 computer:

1. **Left-click** on the **Start** button.
2. **Left-click** on the **Search** field.
3. **Type** `cmd`
4. **Press** the **Enter** key.
5. **Type** `ipconfig /all` in the **DOS prompt** that appears.
6. **Press** the **Enter** key.
7. **Locate** the **Physical Address** listed under **Ethernet adapter Local Area Connection**. You may need to scroll through the information to find this.
