Installing Cisco AnyConnect and Connecting to VPN on Mac OS X

How to Install Cisco AnyConnect

1) Go to https://it.tamucc.edu/downloads/VPN-Clients/. You will be required to enter your IslandID and password.
2) Once you have downloaded the Cisco AnyConnect VPN software you will need to open the file to install the program.
3) Double click on AnyConnect.pkg to proceed.

4) Click Continue> Continue> Agree> Install to proceed.

5) If prompted, enter administrative credentials to complete the installation, then click **Install Software**.

6) When you see the following message indicating the installation was successful, click **Close**.
Navgate to the Applications folder and click on the Cisco folder, then double click on Cisco AnyConnect Secure Mobility Client.

2) In the field provided, enter vpn.tamucc.edu, then click connect.

3) One of the windows below will appear. Enter your IslandID and password. The Second Password field informs Duo Security how you want to authenticate. Type push, phone, or sms, then click OK.  NOTE: For ease of access we recommend using the push option.

<table>
<thead>
<tr>
<th>push</th>
<th>Push a login request to your phone (if you have Duo Mobile installed and activated on your iPhone, Android, Windows Phone, or BlackBerry device). Just review the request and tap “Approve” to log in.</th>
</tr>
</thead>
<tbody>
<tr>
<td>phone</td>
<td>Authenticate via phone call back.</td>
</tr>
<tr>
<td>sms</td>
<td>Get a new batch of SMS passcodes. Your login attempt will fail—log in again with one of your new passcodes</td>
</tr>
</tbody>
</table>
4) Once your identity is verified using DUO Two-Factor Authentication, click Accept.

5) After clicking Accept, you are now connected to the TAMUCC VPN and are able to use the Internal TAMUCC Services.
