Installing Cisco AnyConnect and Connecting to VPN on Windows

How to install Cisco AnyConnect on Windows computers.

1) Go to https://it.tamucc.edu/downloads/VPN-Clients/. You will be required to enter your IslandID and password.
2) Once you have downloaded the correct Cisco AnyConnect VPN software, you will need to open the file to install the program.
3) You will see a Security Warning dialog box. Click on Run to proceed.

4) The software may install automatically or take you through the Cisco AnyConnect Secure Mobility Client Setup Wizard, depending on your browser settings. If prompted to go through the Wizard, click Next>Agree>Next>Install>Finish.
How to connect the TAMUCC network using Cisco AnyConnect VPN.

1) Click the **Start** button > All Apps > Cisco > Cisco Any Connect Secure Mobile Client.

2) The program will open a new window. Enter **vpn.tamucc.edu** and click on Connect.

3) One of the windows below will appear. Enter your IslandID and password. The third field tells Duo Security how you want to authenticate. Type **push**, **phone**, or **sms** into the third field labeled Second Password or Duo Security (push, phone, or sms). **NOTE:** For ease of access we recommend using the push option.
Installing Cisco AnyConnect and Connecting to VPN on Windows

<table>
<thead>
<tr>
<th>push</th>
<th>Push a login request to your phone (if you have Duo Mobile installed and activated on your iPhone, Android, Windows Phone, or BlackBerry device). Just review the request and tap “Approve” to log in.</th>
</tr>
</thead>
<tbody>
<tr>
<td>phone</td>
<td>Authenticate via phone call back.</td>
</tr>
<tr>
<td>sms</td>
<td>Get a new batch of SMS passcodes. Your login attempt will fail—log in again with one of your new passcodes</td>
</tr>
</tbody>
</table>

4) Once your identity is verified using Two-Factor Authentication, click **Accept**.

5) After you click Accept, you are now connected to the campus network using VPN and are able to use Internal TAMUCC Services.
